

**REMARKS**

Applicants acknowledge with appreciation receipt of the Notice of Allowance received for the present case and having a due date of November 8, 2007. As of the date of this filing the Issue Fee is concurrently being paid.

The foregoing specification amendments are being made to consolidate the priority designations contained in the "Cross-Reference to Related Applications" tables appearing on the first page of the application and extending to the second page of the application. As the revisions are directed at formality purposes (consolidation of information presented in the tables filed with the original application), entry is respectfully requested.

Also in the Examiner's Statement of Reasons For Allowance concerning claim 8 there is indicated "with the latch reception supported by the spindle". While this is a preferred arrangement, a review of the allowed claim 8 reveals that it covers additional arrangements as, for example, one where the latch reception component and latch component of the lock in position mechanism are reversed relative to their supporting structure. Thus, in the absence of further commentary from the Examiner, it is considered that the clarification above is sufficient to remedy the disparity between the allowed claim and the Examiner's Statement. If this is not the case the Examiner is requested to respond accordingly.

Also, if any fees are due in connection with the filing of this Amendment, such as fees under 37 C.F.R. §1.16 or 1.17, please charge the fees to Deposit Account 02-4300; Order No. 034017.009.
